

ADVANTAGES

- Eliminates tobacco smoke, weld smoke, construction dust, asbestos and particles of all sizes down to ultrafines.
- Reduces environmental impact.
- Cleans products, fewer operational disruptions.
- Lowers energy costs.
- Filters high load particulate concentrations common in warehouses, processing facilities and production environments.
- Protects employees.
- Reduces cleaning.

Application	Warehouse, processing and manufacturing facilities where dust, welding smoke, oil mist, chemicals and/or fumes are present. Commonly installed where direct source capture may be difficult.
Installation Options	Ceiling or wall mounted.
Comment	2000 and 4000 air delivery cfm.
